

# Alles im Kasten - 1

A. Bergkemper, 3/22

 huit  
 cinq

Wenn du die Kästchen mit den richtigen Buchstaben (nur Kleinbuchstaben, Druckschrift) füllst, ergeben sich Zahlen und Aufgaben. Die Höhe der Kästchen gibt dir Hinweise darauf, welche Buchstaben passen.

$$\square\square\square\dot{\square} \cdot \square\square\dot{\square}\square = \square\dot{\square}\square\square\square - \square\square\square\square\square$$

$$\square\square\square\square\square \cdot \square\square\square\square = \square\square\square\square\square\square - \square\dot{\square}\square$$

$$\square\square\square\square \cdot \square\square\square\square = \square\square\square\square\square\square\square$$

$$\square\square\square\dot{\square} \cdot \square\square\square\square = \square\dot{\square}\square\square\square\square\square$$

$$\square\dot{\square}\square\square \cdot \square\square\square\square\square = \square\dot{\square}\square\square\square\square\square$$

$$\square\square\square\square\square\square\square\square\square\square : \square\square\square\square = \square\dot{\square}\square$$

$$\square\dot{\square}\square\square\square\square\square\square\square\square : \square\square\square\square = \square\square\dot{\square}\square$$

$$\square\square\square\square\square\square\square\square\square\square : \square\square\square\square = \square\dot{\square}\square\square$$

$$\square\dot{\square}\square\square\square\dot{\square}\square : \square\dot{\square}\square = \square\square\square\dot{\square}\square$$

$$\square\square\square\square\square\square\square\square\square\square : \square\square\square\square\square = \square\square\square\square\square$$

$$\square\dot{\square}\square\square\square\square\square\square + \square\square\square\dot{\square}\square = \square\dot{\square}\square\square\square\square$$

$$\square\dot{\square}\square\square\square\square\square\square + \square\square\square\square = \square\square\square\square\square\square$$

$$\square\dot{\square}\square\square\square\square\square\square\square - \square\dot{\square}\square\square\square\square\square = \square\square\square\square\square\square$$

$$\square\dot{\square}\square\square\square\square\square\square\square - \square\square\square\square\square = \square\dot{\square}\square\square\square\square$$
